ERP-Gathering Kielce

Number of the workshop 1

Name of the workshop: **Smart Future villages in Europe – 2 rounds**

Our responses to challenges:

> 1. Starting point how big projects reach really local level.
>   Solution: Choose main focus; 1-3 projects, not 20.

> 2. Definition of a village? Should we talk about smart communities? Check the slide Village models.
>   Solution: you can choose which definition you use for area

Our three proposals for governments & EU

> 1. Development of getting the Optical fibre connection into countryside as well as equipment and skill to use them

Good ideas, practices, processes

> Smart working: focus, communication, involving people to take responsibility, aim to be independent.
>
> Do the basic things first, then the "fancy" one
>
> Time is critical; project is best to last a month or two, not long
>
> Example of Stanz; social innovation combined with the technology token system.
> Need to focus civil society, energy and tourism, of which they focused first into energy creating own energy company out of local need with local resources
